ABOVE & BEYOND

Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomize our brand. Vehicles with exemplary design credentials and engineering capabilities. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

RANGE ROVER

BUILD YOUR OWN

Reflecting its unrivaled heritage, the Range Rover takes design, comfort and craftsmanship to extraordinary new heights. As striking on the outside as it is refined within, its performance and capability are peerless. Exemplary levels of comfort and technology bring you a heightened sense of effortless sophistication and a truly first-class travel experience.

EXTERIOR

With its floating roof, continuous waistline and lower accents, the silhouette of the Range Rover is recognized around the world. Those commanding looks have been given an even more contemporary profile. The front grille signals take on a more prominent appearance, while the clamshell hood, formed of a single sheet of aluminum, is now smoother and longer to augment the vehicle's more formal, upright profile.

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

VERSATILITY

PERSONALIZATION

Thanks to the unique Command Driving Position of the Range Rover, the driver continues to enjoy an enhanced view of the road ahead, but now does so in even greater comfort than before. Cossetted in premium materials such as Semi-Aniline leather¹, wider seats and deeper cushioning with soft foam interlayers help create the most luxurious environment. Combined with enhanced seat functionality, including the optional upper seat shoulder support and 'hot stone' massage¹, along with intuitive controls using the door-mounted seat control switches, the interior of the Range Rover is the ultimate in refinement.

Seamlessly integrated technologies built around the Touch Pro Duo Touchscreens* and Interactive Driver Display embody our design ethos; cleaner, crisper lines and fewer dials - delivering an uncluttered console that doesn't distract the driver. Veneers and luxury finishers amplify the vehicle's refined design cues, while enhanced Configurable Ambient Lighting with a choice of 10 colors adds greatly to the overall sense of calm. Additional integrated storage solutions including a center console deep storage compartment, and other optional features including the front center console refrigerator compartment confirm a purity of craft everywhere you look and touch, standard on Westminster.

No matter how far you travel in a Range Rover, you'll always arrive as refreshed as when you set out. It's not where you go, it's how you get there.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so.

¹Model dependent.

PERFORMANCE

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

VERSATILITY

PERSONALIZATION

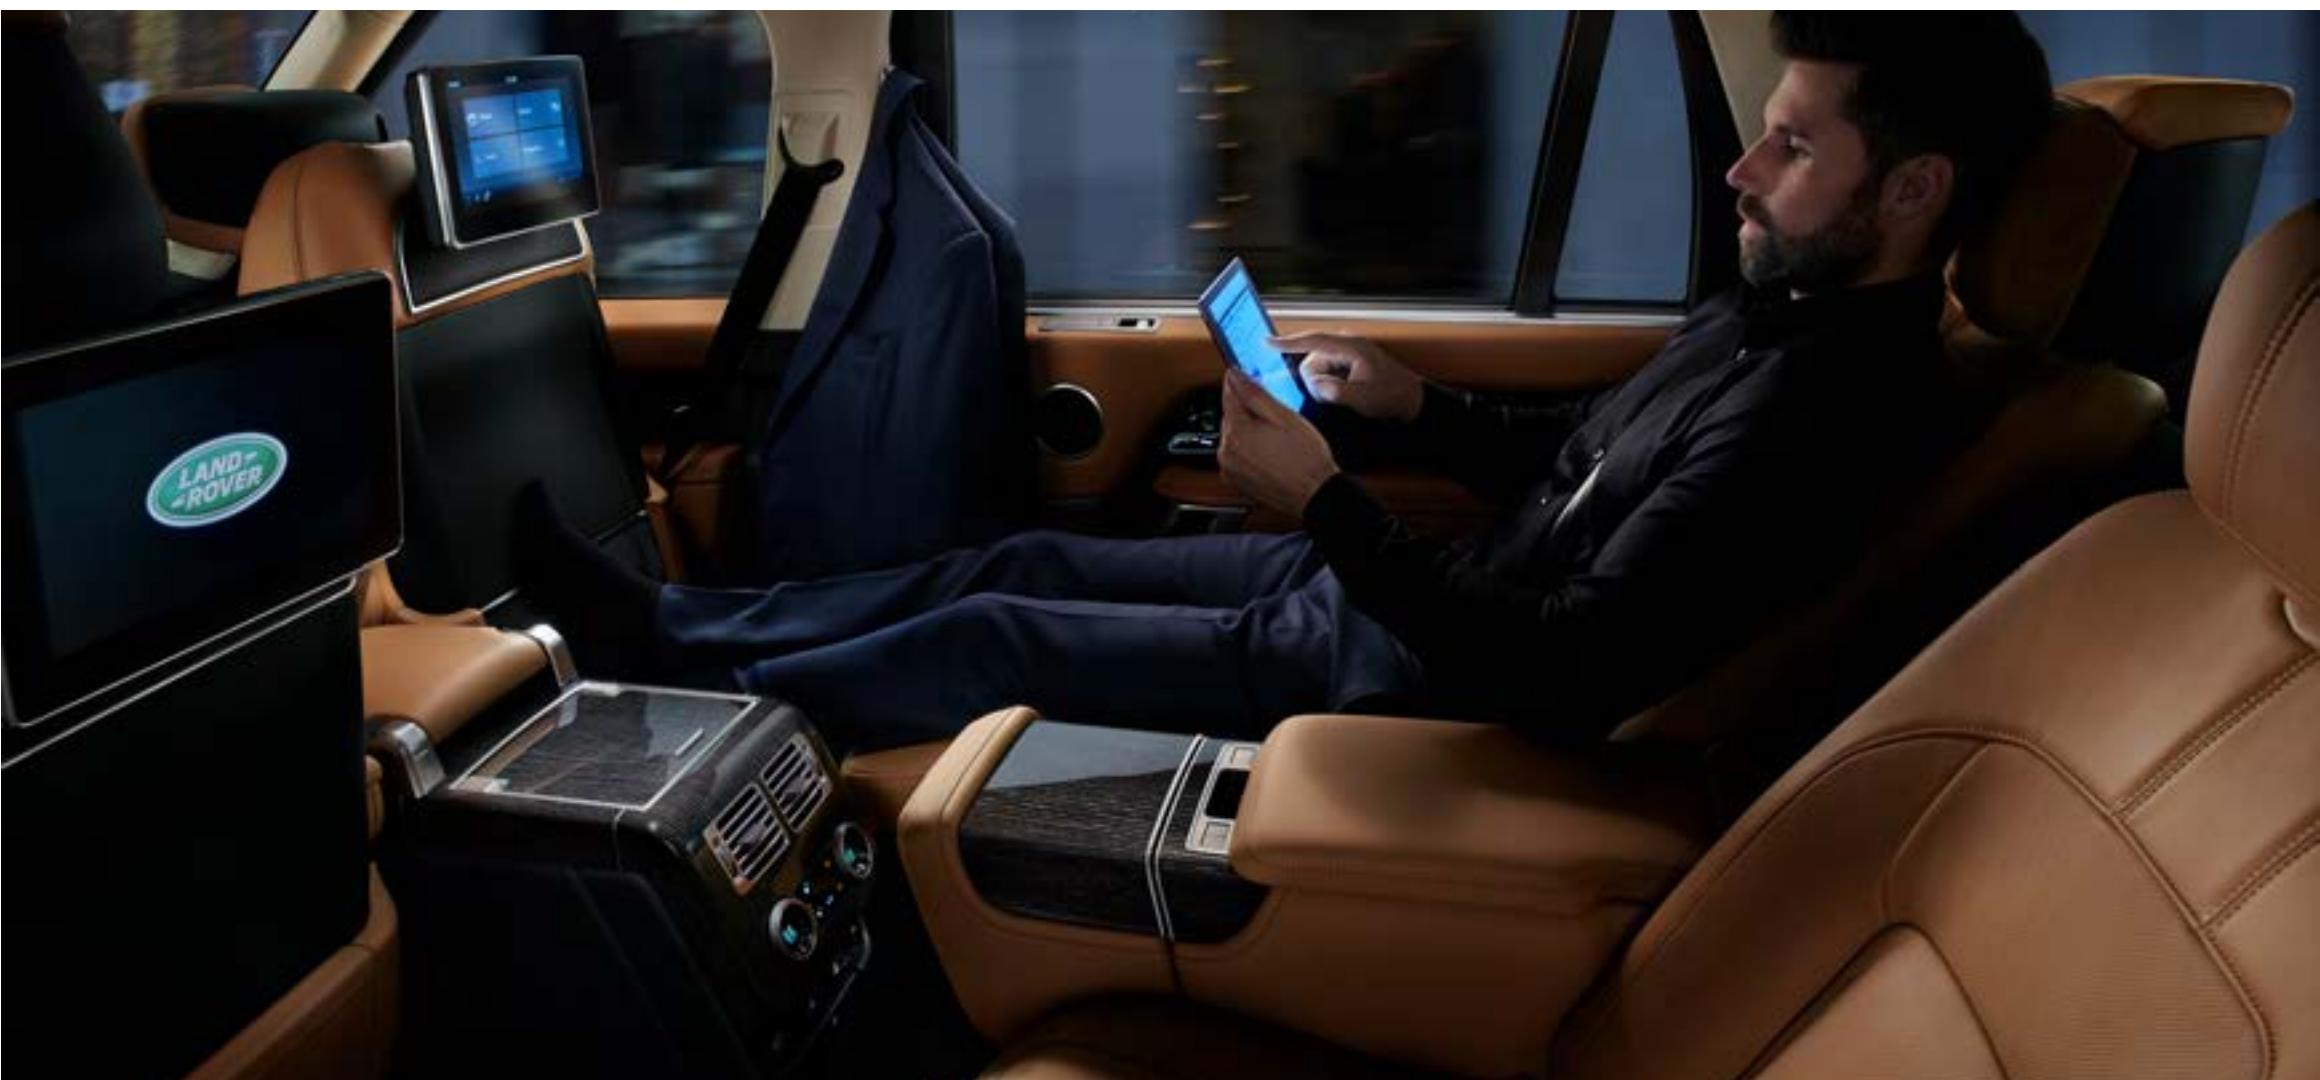

Everyone who travels in a Range Rover vehicle does so in the utmost comfort and style. Refinement is everywhere you look and in everything you touch; nothing exemplifies this better than the rear Executive Class seating, standard on Autobiography.

As with the front, the rear also features wider seats with deeper cushioning. The rear Executive Class seats take this to another level. When lowered, a power deployable center console with premium veneer finishers and clever storage solutions integrates seamlessly with the two outer passenger seats, creating a luxury four-seat environment. And at the touch of a button, Extreme Passenger Seat Away will adjust the front passenger seat forward to maximize the rear passenger's space and forward visibility, while the extended recline and integrated side cushions mean the passenger can adjust their seat into their optimum position.

Optional Executive Class Comfort¹ features, including adjustable bolsters, upper seat shoulder support, headrest pillows and 'hot stone' massage¹, further enhance the rear passenger's trip. While additional Executive Class Comfort Plus¹ features, such as heated armrests, heated calf rest, and a footrest with a dedicated area to warm your feet create a truly luxurious environment.

¹Model dependent.

Interior shown: Range Rover Autobiography Long Wheelbase in Ebony/Vintage Tan with optional equipment.

When you require increased versatility, simply retract the power deployable center console to reveal a center seat for a third occupant. Or for the first time, fold your rear Executive Class seats forward to maximize your cargo space: you can do so even when you're not in the vehicle using the Remote Intelligent Seat Fold Application.

Other available features include Rear Seat Entertainment with 10" Touchscreens, Connect Pro connectivity with 4G Wi-Fi*, and Comfort Controller Remote app for greater control of features such as seat massage, heating and cooling, and personal climate settings. Enhanced Task Lighting is provided as standard and comes with user-selectable modes, including a bright light and a warm light setting for a more relaxed environment, making the Range Rover the perfect partner for your journey.

REAR EXECUTIVE CLASS SEATING WITH POWER DEPLOYABLE CENTER CONSOLE STORED.

REAR EXECUTIVE CLASS SEATING WITH POWER DEPLOYABLE CENTER CONSOLE DEPLOYED.

*The Wi-Fi Hotspot is intended for passenger use only. InControl features may require an additional subscription with separate terms and conditions.

THE RANGE ROVER LONG WHEELBASE

 BUILD YOUR OWN

The Range Rover Long Wheelbase is instantly recognizable, superbly engineered and beautifully appointed. Featuring a sliding panoramic roof as standard, this body style is characterized by a distinctive 'L' badge mounted behind each front wheel arch. The exterior is extended by 7.8 inches to facilitate an even more luxurious environment inside. The definitive luxury SUV, the Range Rover Long Wheelbase has an additional 7.5 inches of interior floorspace for even more passenger legroom and comfort.

Standard features include an added deep center storage compartment at the rear of the front center console, electric rear side window sunblinds, Configurable Ambient Lighting and illuminated treadplates. With optional features such as Cabin Air Ionization with PM2.5 filter, which ionizes particles in the air, making them attract to surfaces thus helping cleanse the air, and Four-zone Climate Control, enabling personalized temperature control through an additional climate unit, passengers in the Range Rover Long Wheelbase can create their own tranquil haven.

PERFORMANCE

ENGINES AND TRANSMISSION

All engines are equipped with Stop/Start technology and smart regenerative solutions to capture wasted kinetic energy when the vehicle is decelerating to reduce fuel consumption, especially during urban driving. Ingenium technology underpins the 6-cylinder gas engines in the range. These low-friction, all-aluminum engines have stiff cylinder blocks and twin balancer shafts to ensure inherently low levels of vibration, enabling a smooth and refined driving experience.

8-SPEED AUTOMATIC TRANSMISSION

All engines in Range Rover are coupled with an 8-speed Automatic Transmission. With eight closely spaced ratios, the transmission ensures that you are always in the optimum gear, improving fuel efficiency and acceleration. Gear changes are almost imperceptible and shift schedules intelligently adapt to your driving style.

PLUG-IN HYBRID ELECTRIC VEHICLE

P400e¹ uses the combination of an advanced 2.0 liter 296HP Si4 Ingenium Gas engine supported by a high-capacity 105kW electric motor, to deliver a combined output of 398HP. The electric motor can either supply its power in parallel with the engine, or drive the vehicle in the manually selectable Electric Vehicle (EV) Mode. The large 13kWh capacity battery gives the vehicle an all-electric range from a full charge, capable of managing most city commutes² with zero tailpipe emissions. Capability, performance and cutting-edge technologies are at the heart of every Land Rover vehicle. Taking our vehicles into the future, electric power now propels us into an exciting new era.

One of our first plug-in hybrid electric vehicles (PHEV) is driven by our most innovative powertrain yet; an advanced Ingenium gas engine and electric motor combine to give a composed and luxurious ride, with full Range Rover capability². Drivers can select from two driving modes to best suit their needs.

¹Only available on SWB. ²Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy.

DESIGN

PERFORMANCE

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

VERSATILITY

PERSONALIZATION

Parallel Hybrid Mode (Default driving mode) - Combined gas and electric drive. When in Parallel Hybrid Mode, the driver can optimize battery charge or fuel economy by utilizing two alternative charge management functions:

SAVE function - Prevents the battery charge dropping below the level which has been selected.

Predictive Energy Optimization (PEO) function - By entering a destination in the Navigation system* the driver enables the feature, which utilizes altitude data for the route selected to intelligently switch between the electric motor and gas engine to optimize fuel economy.

EV (Electric Vehicle) Mode - Full electric drive¹.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so.

¹Parallel Hybrid Mode will be automatically re-engaged should the driver require more power and torque than is available, or the battery charge drops to an insufficient level to maintain progress.

Seamless Design - Integrating the charging port into the front grille provides easy connection without compromising the vehicle's iconic design.

EV Range - PHEV is fully capable of managing most city commutes in full Electric Vehicle (EV) Mode¹.

Refined Drive - The Range Rover PHEV ensures seamless transition between the gas engine and electric motor, delivering optimal refinement.

No Compromise on Capability and Performance - It is fully capable of handling off-road situations such as wading² and rock crawl. Its on-road performance is equally remarkable, delivering additional power when you need it most.

¹Parallel Hybrid Mode will be automatically re-engaged should the driver require more power and torque than is available, or the battery charge drops to an insufficient level to maintain progress.

²Wading is only available when engine is engaged.

Easy Overnight Charging - PHEV can fully charge from a domestic electricity supply in as little as 14 hours¹, so it's ideally suited to charging at home overnight.

Charging Solutions - Using a Level 2 charger, a full charge can be achieved in as little as 2.75 hours¹. In addition, a range of charging points can be used at offices, stores, parking lots and other designated public charging places.

InControl Connectivity - With the Protect and Remote Premium² features, a variety of functions are available through your smartphone device, from enabling the driver to view charge status, to remote operation of the vehicle's climate systems.

¹Charging times will vary by market, power supply and charging solution. Please refer to landroverusa.com for further information.

²Land Rover Remote contains subscription services that can be extended after the initial term advised by your Land Rover Retailer. The Land Rover Remote App will need to be downloaded from the Apple App Store/Google Play Store.

PERSONALIZATION

1 105KW ELECTRIC MOTOR

PHEV features a high-power 105kW permanent magnet synchronous electric motor to deliver power effortlessly.

2 INTEGRATED HYBRID AUTOMATIC TRANSMISSION

A seamless transition from EV to the Internal Combustion Engine (ICE) is delivered via the hybrid integrated transmission.

3 2.0 LITER INGENIUM ENGINE

Developed and engineered by Jaguar Land Rover, the aluminum 2.0 liter 296HP Si4 Ingenium Gas engine is lighter and more efficient than its predecessors.

4 13KWH HIGH-VOLTAGE BATTERY

The large capacity battery gives the vehicle an all-electric range, capable of managing most short commutes¹ from a full charge.

5 7KW ONBOARD CHARGER

The powerful 7kW onboard charger can deliver a full battery charge in as little as 2.75 hours² dependent on charging station capability.

6 INTEGRATED STARTER GENERATOR

The Integrated Starter Generator (ISG) delivers an exceptionally refined starting of the gas engine when required.

7 REGENERATIVE BRAKING

Regenerative braking uses the electric motor to harvest kinetic energy while braking, converting it to electrical energy that is used to recharge the high-voltage battery.

¹Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy.

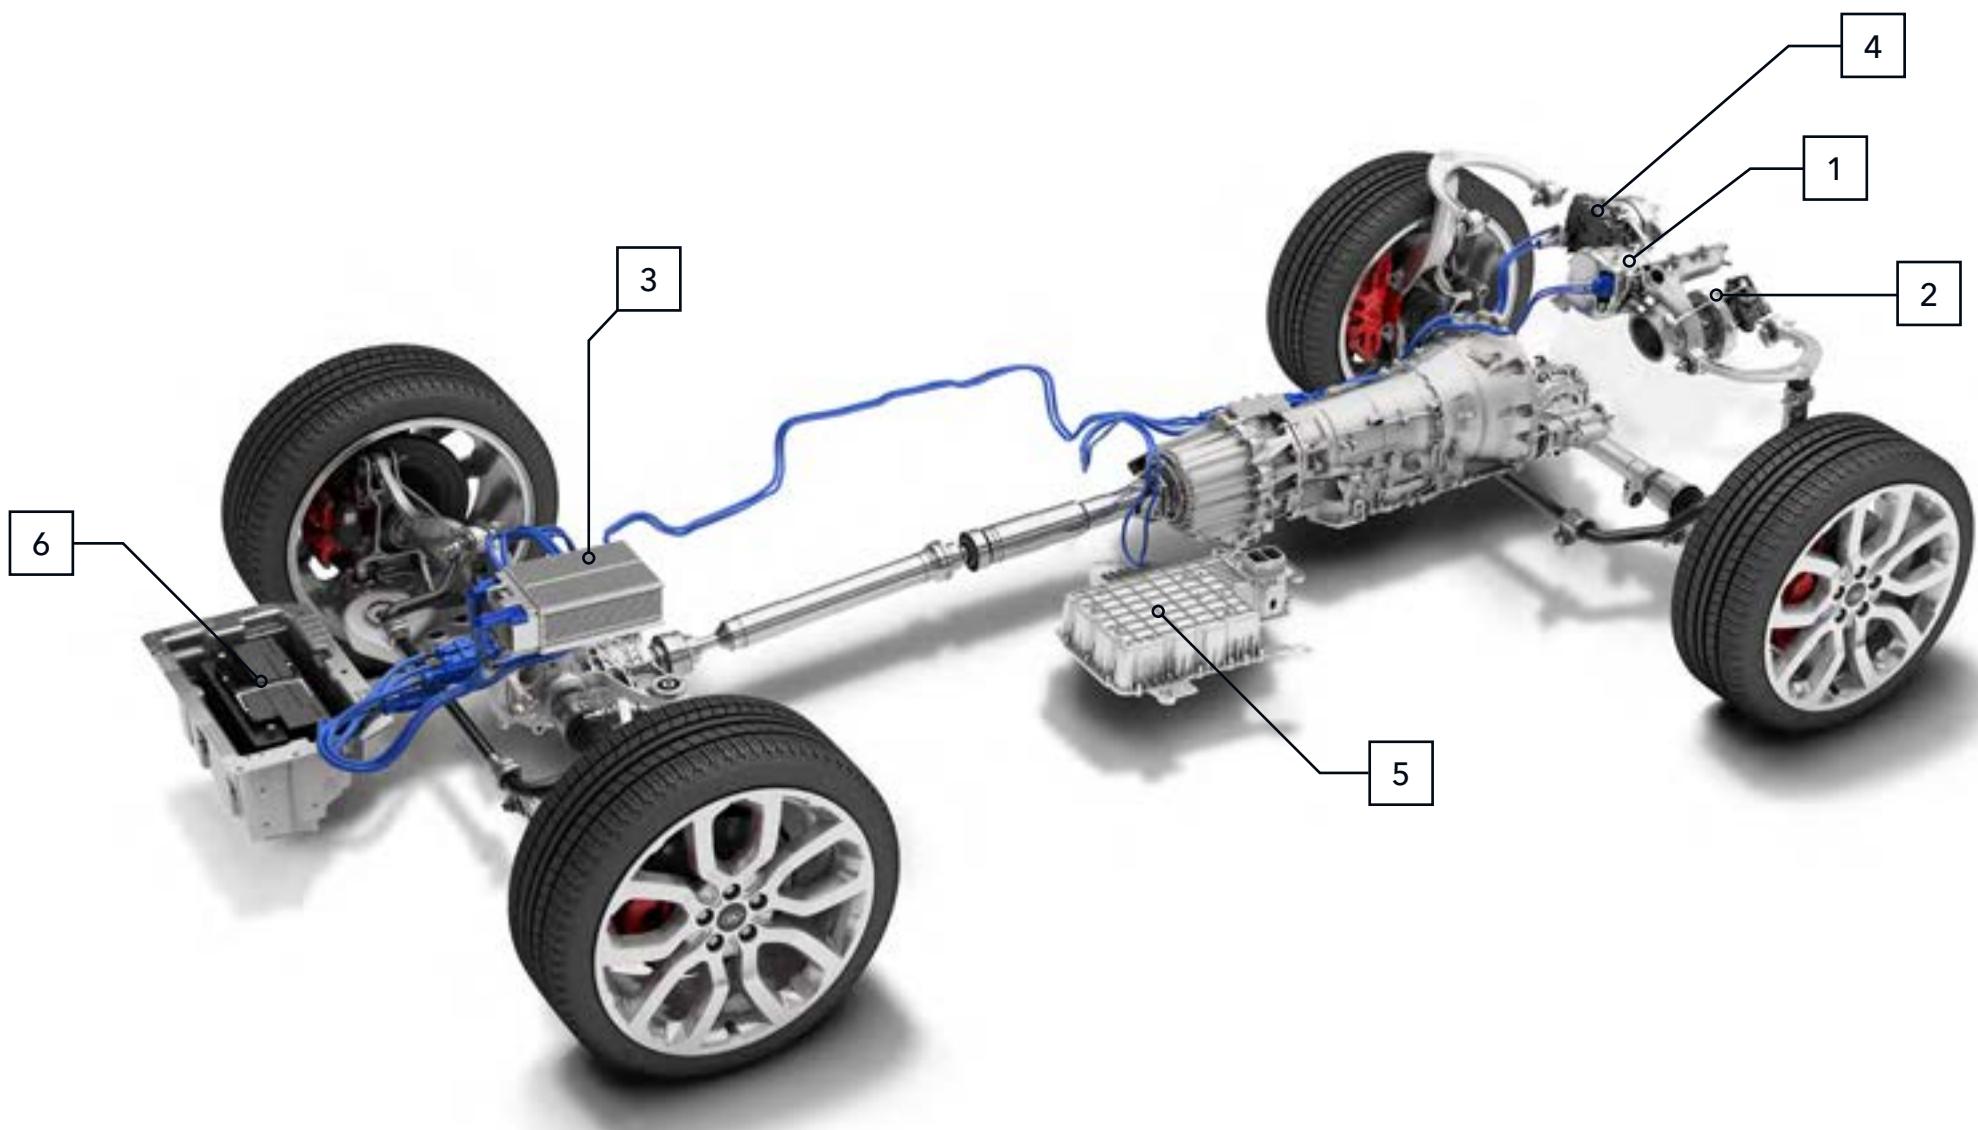

²Charging times will vary by market, power supply and charging solution. Please refer to landroverusa.com for further information.

MILD HYBRID ELECTRIC VEHICLE

Land Rover is at the forefront of sustainable innovation. Taking our vehicles into a smarter and more exciting future, Mild Hybrid Electric Vehicle (MHEV) technology is a system that uses a belt-driven starter generator and state-of-the-art 48V battery. These harvest energy that would normally be lost during deceleration, which is then intelligently redeployed.

The stored electricity can be used by the starter generator to provide torque assistance to the engine directly, or to power the electric Supercharger to boost performance before the conventional Turbocharger reaches its maximum output, giving seamless throttle response. This system helps improve fuel economy and boosts the vehicle's performance.

The MHEV technology is standard with P360² and P400 engines².

- 1 48V ELECTRIC SUPERCHARGER¹
- 2 TWIN-SCROLL TURBOCHARGER
- 3 48V LITHIUM-ION BATTERY
- 4 BELT-DRIVEN INTEGRATED STARTER GENERATOR
- 5 48V/12V DC-DC CONVERTER
- 6 12V BATTERY

¹Engine dependent. ²Only available on SWB.

LEGENDARY BREADTH OF CAPABILITY

The Range Rover continues to offer outstanding capability on and off-road, with permanent All Wheel Drive (AWD), twin-speed transfer box, Adaptive Dynamics and electronic center differential as standard. While the Land Rover revolutionary Terrain Response® system means this capability can be harnessed by all drivers, expert and inexpert alike. This extraordinary capability can be extended to suit individual requirements with a range of additional, optional all-terrain technologies*.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

ELECTRONIC AIR SUSPENSION

A sure-footed, composed drive is completed by the latest Electronic Air Suspension, which provides exceptional wheel articulation and poise. It changes the vehicle's height quickly, allowing cross linking of the diagonal wheels to help keep all four wheels on the ground on very uneven surfaces. Added to which, it makes loading heavy objects into the cargo area easier, as you can lower the vehicle's rear suspension height by up to 1.9 inches to suit your needs. These functions can be operated via the 10" Touchscreen, a button in the cargo space area, or remotely using the key fob.

The Range Rover has a choice of ride height settings to assist the driver and passengers of the vehicle at different stages of their journey or across various terrains; from an access height of 1.9 inches below normal ride height, to an extended height of up to 2.9 inches, with a further extended ride height up to an additional 3.1 inches in more extreme off-road conditions.

The Speed Lowering system uses the Electronic Air Suspension to reduce aerodynamic drag and fuel consumption at cruising speeds, by lowering the vehicle by over a half an inch from normal ride height when the speed reaches 65 mph*.

TWIN-SPEED TRANSFER BOX WITH ELECTRONIC CENTER DIFFERENTIAL

An additional set of lower gears can prove invaluable in challenging conditions such as steep inclines or declines, off-road driving or when towing. The two-speed transfer box system gives you precise speed and control in such instances. The heart of the two-speed system is the electronic center differential, that offers a 50:50 torque split between front and rear axles with the ability to pre-emptively lock the axles before slip commences.

TERRAIN RESPONSE®

When you manually select the Land Rover unique standard Terrain Response®¹ system, it sets the vehicle up optimally to match the demands of the terrain, by adapting the responses of the vehicle's engine, gearbox, differentials and chassis systems. There are seven manual Terrain Response settings: Comfort, Dynamic, Eco, Grass, Gravel, Snow, Mud and Ruts, Sand, and Rock Crawl**.

TERRAIN RESPONSE® 2

Our unique Terrain Response® 2² system is an option designed to monitor driving conditions, and automatically optimize driveability and traction by adapting the responses of the vehicle's engine, gearbox, center differential and chassis systems to match the demands of the terrain. You can manually override the system should you wish**.

*Always follow local speed limits. **These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

¹Model dependent. ²Optional feature. Requires fitment of an additional feature.

ACTIVE LOCKING REAR DIFFERENTIAL*

The Active Locking Rear Differential¹ is designed to ensure the greatest level of traction in various weather conditions, both on and off road. The permanent All Wheel Drive (AWD) and Electronic Traction Control (ETC), both fitted as standard, distribute torque to both the front and the rear wheels, and by braking the wheels independently, improve traction respectively. The addition of the Active Locking Rear Differential delivers the ultimate combination to improve traction through limiting slip across the rear wheels.

A second multi-plate wet clutch between the rear wheels can lock almost instantly to provide full engine output torque to both wheels. This can be especially useful to deliver effortless capability in low-grip conditions, such as wet grass or during wheel articulation off road. It also provides enhanced traction when exiting a corner, as when the inside wheel becomes unloaded due to weight transfer, the Active Locking Rear Differential increases the torque to the outside wheel.

DYNAMIC RESPONSE*

Dynamic Response¹ improves vehicle handling through hydraulic roll control, optimizing on-road performance and passenger comfort by reducing the amount of body lean during cornering. By controlling the front and rear axles independently, it can deliver increased low-speed agility, along with enhanced high-speed stability and greater steering precision.

ADAPTIVE DYNAMICS*

Adaptive Dynamics makes the miles go by virtually unnoticed. The system monitors vehicle movements up to 500 times a second, reacting to driver or road inputs almost instantaneously to give greater control and minimize body movement, helping to ensure a composed, flat ride. The system even senses off-road conditions, and optimizes damping accordingly so driver and passengers arrive at their destination refreshed and relaxed.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

¹Engine dependent.

DESIGN

PERFORMANCE

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

VERSATILITY

PERSONALIZATION

ALL TERRAIN PROGRESS CONTROL

All Terrain Progress Control (ATPC)¹ is an optional system that helps you to set and maintain a steady speed in challenging conditions such as slippery surfaces, including mud, wet grass, snow and dirt roads. Operating like a cruise control system, it functions at low speeds between 1 mph and 18 mph, enabling you to maintain full concentration on steering and finding a path through obstacles*.

LOW TRACTION LAUNCH

Providing you with improved torque control when you move off from a standstill, Low Traction Launch can be activated from the Touchscreen and enhances capability in slippery conditions like wet grass and snow*.

HILL DESCENT CONTROL

The Land Rover patented Hill Descent Control (HDC[®]) is a standard feature. It assists the driver with controlled descents of difficult slopes. It does so by maintaining a constant speed and applying braking separately to each wheel*.

WADE SENSING**

Unique to Land Rover, this optional system uses ultrasonic sensors in the side mirrors to visually and audibly alert the driver if the water approaches the vehicle's class-leading wading² depth of up to 35.4 inches. It does so by providing real-time pictorial information via the Touchscreen about its depth in relation to the vehicle and its maximum wading capability. Only available with 360° Surround Camera.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Driving in floodwaters or moving water should be avoided. Driving through water can be extremely dangerous. The Wade Sensing feature only detects depth of water the vehicle is in at the present time and not of water ahead or around the vehicle. Therefore, Wade Sensing cannot predict whether it is safe to proceed and cannot detect steep drops in grade around the vehicle. The driver is responsible for determining the conditions of the route being driven.

¹Optional feature, engine dependent. Requires fitment of an additional feature. ²Wading is only available when engine is engaged.

HOW DOES MUSIC MAKE YOU FEEL?

Music has the power to change your mood, evoke memories and affect your wellbeing. It can give you tingles or make you cry. It's why music and cars go so well together. Sitting behind the wheel, listening to your favorite artist, band or composer. It's your space. Your world.

But what if you could do more than simply listen to the music? What if you could feel it, experience it, immerse yourself in it? What if you could make more of a connection with the music and enjoy a greater sense of acoustic involvement in your Range Rover?

British-based Meridian™ Audio* are all about the musical experience – the very sense of being there. Their award-winning, precision-engineered audio systems are built on a lifetime of research into psychoacoustics (the science of how the human brain perceives sound) to deliver a performance that is so true to life, you feel every beat, every breath.

*Meridian™ is a registered trademark of Meridian Audio Ltd. Trifield™ and the three fields device is a trademark of Trifield Productions Ltd. Features and their availability may differ by vehicle specification and market.

The exterior color Portofino Blue on the Land Rover vehicle shown may not be accurately reproduced in this brochure. Please visit your local Land Rover Retailer to view the color on an actual Land Rover vehicle and/or paint panel.

FEEL THE MUSIC WITH MERIDIAN™

Meridian's approach to in-car audio is all about managing the sound stage; intensifying the levels of depth, clarity and realism of the music, by using a combination of advanced acoustic technology and strategically positioned speakers.

Wherever you sit in the vehicle, you'll get the same concert quality sound. Each strike of the piano, every guitar pick, horn blast, chorus and melody reveals itself with precision and texture, just as the artist intended. It's intimate, dramatic and very atmospheric – whether you're off road or stuck in rush hour traffic.

EXPLORE MERIDIAN

DRIVER ASSISTANCE

MAKING DRIVING EASIER

From negotiating city traffic or the highway, to providing additional assistance for you and your passengers, there's a wealth of innovative technologies available; either as standard, optional or as part of an optional pack. Whichever you choose, you'll find every single feature has been designed and engineered to heighten your enjoyment of the vehicle.

STANDARD DRIVE FEATURES

Cruise Control and Speed Limiter* makes long distance driving easier. Both features help to maintain the speed of the vehicle, reducing the need to continually use the accelerator pedal.

Emergency Braking^{*†} can detect an imminent forward collision with other vehicles or pedestrians and can assist to mitigate the potential for a collision. It displays a warning in the event of an imminent collision, and automatically applies the brakes if no action is taken.

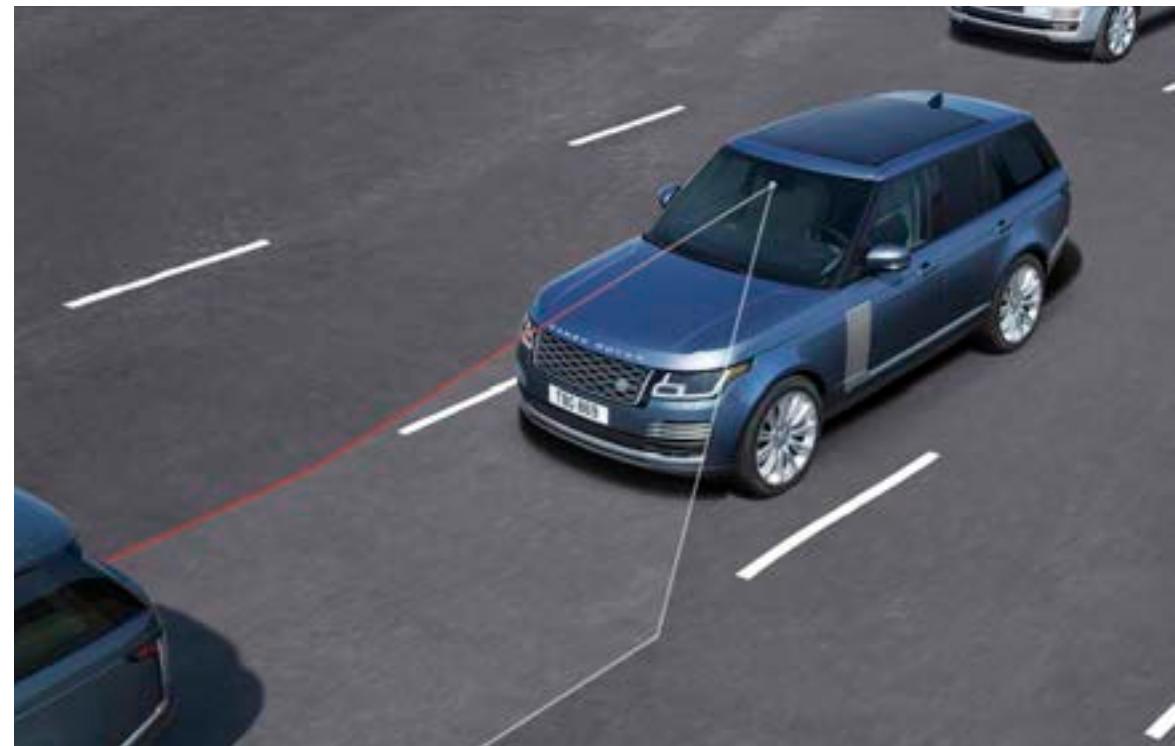

Lane Departure Warning* can help make long journeys easier. The system senses when your vehicle is unintentionally drifting out of your lane, and notifies you with a visual alert and a gentle vibration of the steering wheel.

Lane Keep Assist* detects when your vehicle is unintentionally drifting out of lane and will apply a corrective torque to the steering wheel to encourage you to guide your vehicle back.

OPTIONAL DRIVE FEATURES

Adaptive Cruise Control^{1*} works when you're cruising on the highway or traveling in slow-moving traffic. It is designed to keep your vehicle a set distance from the one in front, should it slow or stop. Should the vehicle in front stop completely, your vehicle is designed to come to a smooth stop*. In stop-start traffic, Adaptive Cruise Control will automatically resume following the car in front. The system can be activated from 12 mph and once activated will operate up to highway speeds*.

High-speed Emergency Braking^{1*} is designed to detect when a potential frontal collision with another vehicle may occur, and displays a forward alert to warn the driver to brake. If the driver doesn't react[†], the vehicle will deploy the brakes in order to reduce the severity of the possible impact. High-speed Emergency Braking is ready and active from 6 mph to 99 mph**.

Lane Departure Warning

Adaptive Cruise Control

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Always follow local speed limits. [†]Please note that if any action is taken, even minimal steering, the Emergency Braking system will assume the driver resumed control of the vehicle and the system will automatically disengage.

¹Optional feature. Requires fitment of an additional feature.

DRIVE PACKS

OPTIONAL DRIVE PACK

The optional Drive Pack offers a range of features that help keep you informed. The Drive Pack includes:

Driver Condition Monitor is designed to detect if you're starting to feel drowsy and to give you an early warning when you need to take a break*.

Blind Spot Monitor is designed to alert you to vehicles in, or quickly approaching your blind spot. When a vehicle is detected, a small warning light will illuminate in the corresponding side mirror. If you apply the turn signal in the direction of the vehicle, the warning light will flash to highlight potential danger*.

Traffic Sign Recognition keeps you informed and aware on the road, by displaying speed limits and 'no passing' signs in the instrument cluster, where they can easily be seen. When activated, Adaptive Speed Limiter uses Traffic Sign Recognition information to adjust your vehicle's speed accordingly**.

Adaptive Speed Limiter uses data from the Traffic Sign Recognition system to automatically select the speed limit. If the system detects the vehicle is above the speed limit, such as when entering a lower limit, the accelerator will be disabled allowing the vehicle to coast down to the limit. The driver can also apply the brakes to achieve this more quickly*.

OPTIONAL DRIVE PRO PACK

For an even more relaxed drive, the optional Drive Pro Pack contains a wide range of driver assistance features including the Driver Condition Monitor and Traffic Sign Recognition with Adaptive Speed Limiter in the Drive Pack, plus:

Blind Spot Assist is designed to help mitigate the potential for a collision. If your vehicle detects another car in your blind spot when you begin to change lanes, a small warning light illuminates in the corresponding side mirror and a steering torque encourages you to guide your vehicle away from the approaching vehicle*.

Adaptive Cruise Control - See page 35 for description.

High-speed Emergency Braking[†] - See page 35 for description.

Traffic Sign Recognition with Adaptive Speed Limiter

Blind Spot Assist

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Always follow local speed limits. [†]Please note that if any action is taken, even minimal steering, the Emergency Braking system will assume the driver resumed control of the vehicle and the system will automatically disengage.

PARK FEATURES

ENJOY STRESS-FREE PARKING

Range Rover offers the most advanced technologies to deliver intuitive and easy parking solutions. Whether reversing, parallel parking or getting into or out of tight spaces, these features make life easier. Available as standard, optional or as part of an option pack.

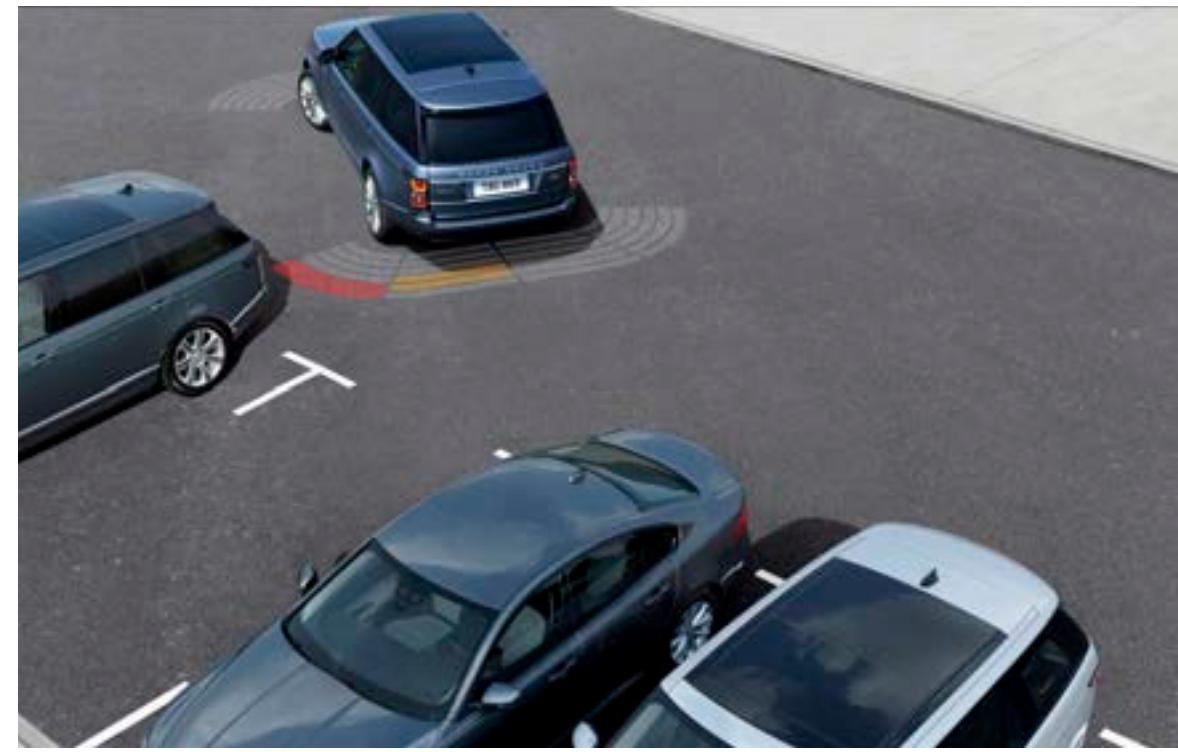

STANDARD PARK FEATURES

Front and Rear Parking Aid* indicates your proximity to nearby obstacles detected by sensors located in the front and rear bumpers, helping make maneuvering that little bit easier.

Rear Camera* provides improved visibility when reversing. Guiding lines representing the vehicle's outer perimeter and projected path are superimposed onto the rearward image displayed.

OPTIONAL PARK FEATURES

360° Surround Camera* uses four digital cameras discreetly placed around the vehicle, providing a 360° overhead view on the Touchscreen. With the capacity to display several different views at the same time, this helps with various maneuvers from parking by a curb, to getting in and out of tight spaces and intersections*.

Front and Rear Parking Aid

360° Surround Camera

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

DESIGN

PERFORMANCE

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

VERSATILITY

PERSONALIZATION

OPTIONAL PARK PACK

The optional Park Pack assists you with maneuvering in tight spaces and in city environments, it features:

360° Parking Aid gives you confidence when maneuvering in tight spaces. Sensors located around the vehicle are automatically triggered when Reverse is selected, or can be manually activated, with a graphic appearing on the Touchscreen showing an overhead view of the vehicle. As you park, the Touchscreen display and audio feedback indicates how close you are to obstacles*.

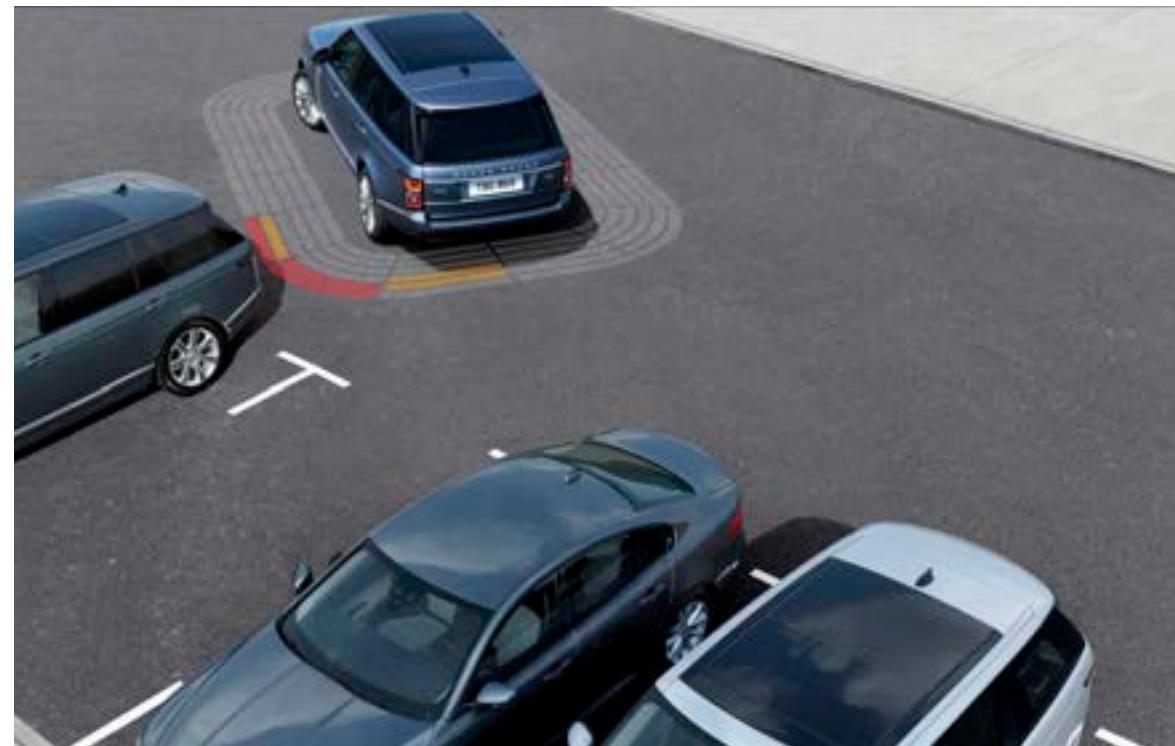

Rear Traffic Monitor warns you of vehicles, pedestrians or other hazards approaching from either side. Particularly useful when reversing out of a parking bay*.

Clear Exit Monitor helps passengers as they exit the vehicle by providing an illuminated warning in the door if an approaching hazard is detected, such as passing vehicles and cyclists*.

OPTIONAL PARK PRO PACK

The optional Park Pro Pack enables you to park and maneuver more easily in and out of tight spaces and into traffic that is obscured by buildings or other vehicles. It includes the 360° Parking Aid, Rear Traffic Monitor and Clear Exit Monitor in the Park Pack*, plus:

Park Assist makes parking easier than ever before by automatically detecting available parking spaces and offering to park for you. At your command, your vehicle will complete the full parking maneuver automatically while you simply sit back and keep an eye on the surroundings*.

360° Parking Aid

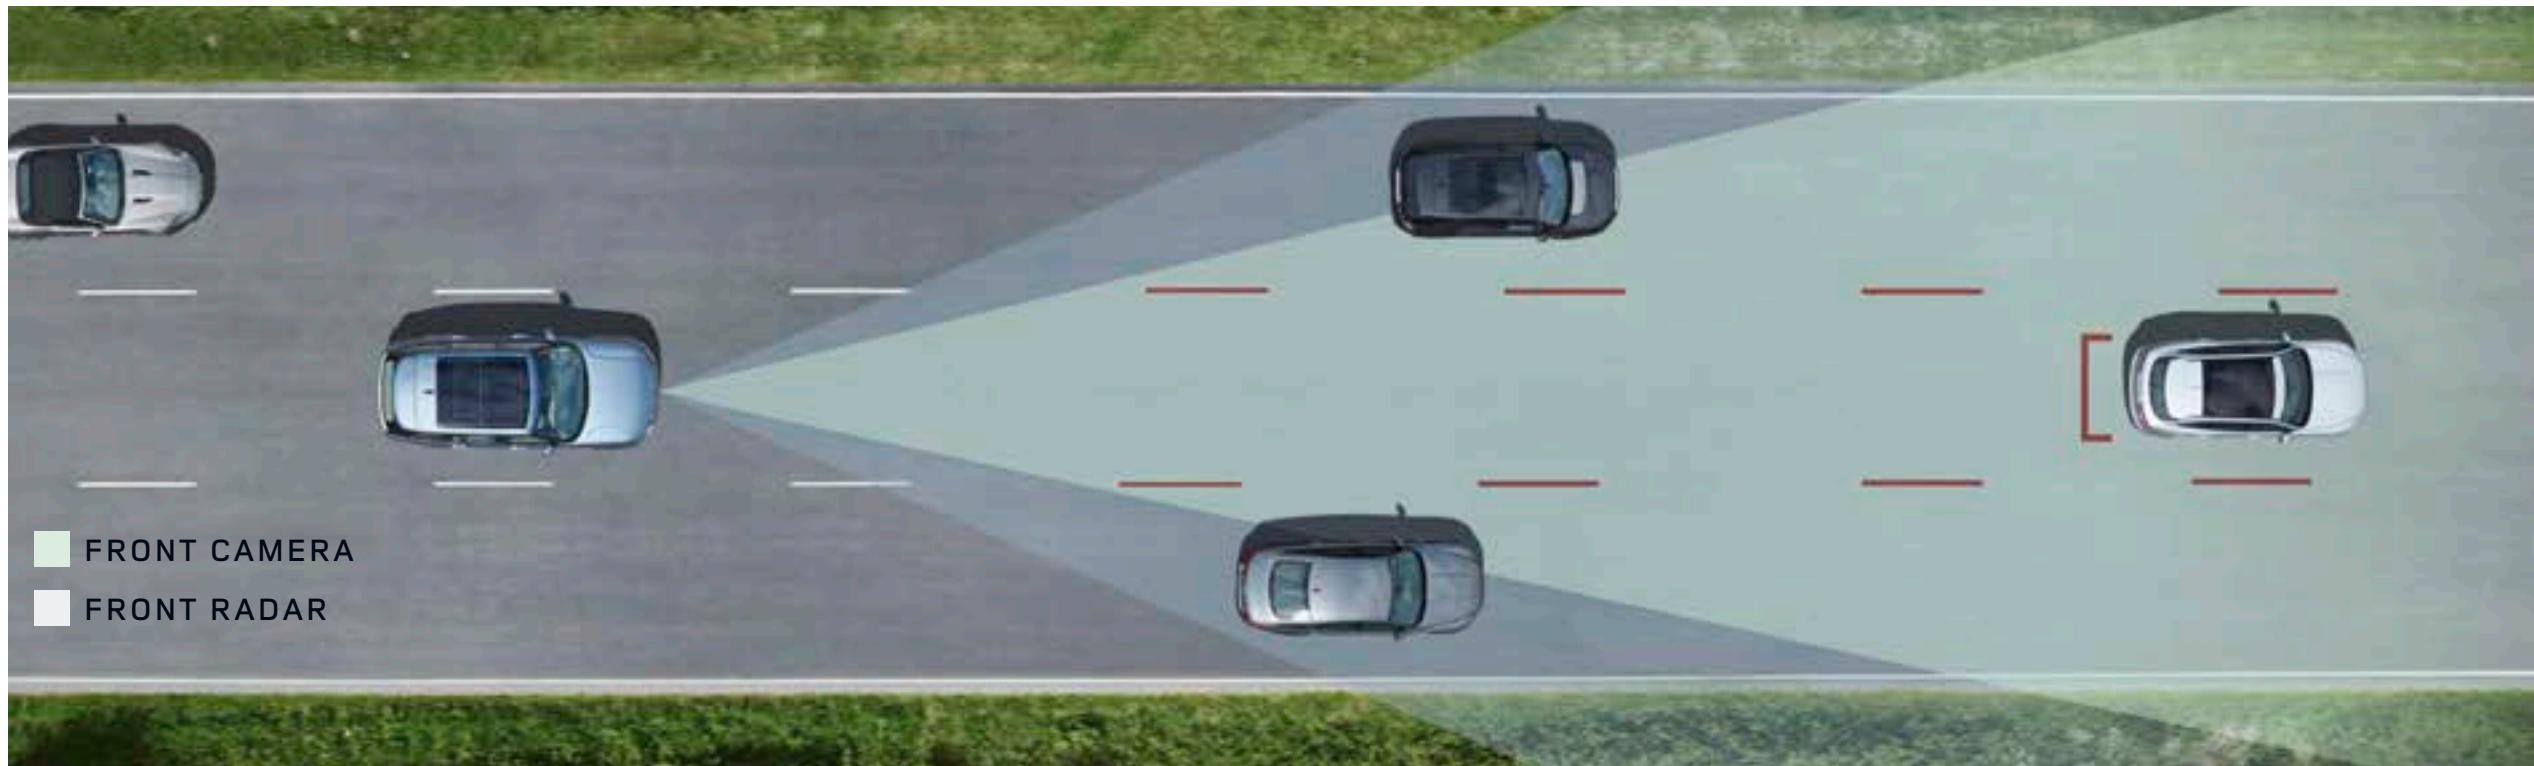

Park Assist

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

DRIVER ASSISTANCE

DRIVER ASSIST PACK*

The optional Driver Assist Pack offers a wide range of driver aids including the features found in the Drive Pro Pack (see page 36), the Park Pro Pack (see page 38) and the 360° Surround Camera. It also includes Adaptive Cruise Control with Steering Assist. This latest technology makes highway driving and heavy traffic situations even easier and more comfortable. It achieves this by gently assisting acceleration and braking to maintain a set distance from vehicles ahead. Moderate steering interventions ensure that the physical effort of maintaining a central vehicle position is reduced.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

Vehicle shown: Range Rover Autobiography in Byron Blue with Navy/Ivory interior with optional features fitted.

SUSTAINABLE BY DESIGN

Land Rover are committed to producing vehicles that use more sustainable materials, produce less waste and use fewer natural resources as part of our approach to sustainable business. The development process of the Range Rover has included a full life-cycle assessment and has been designed to be 85 percent recyclable/reusable and 95 percent recoverable at the end of the vehicle's life.

Our innovative design enables the use of a unique alloy in the vehicle body, made from up to 50 percent recycled aluminum derived from our closed-loop manufacturing process, retaining quality and performance but delivering lower life cycle CO₂ emissions. Closed-loop manufacturing means taking the scrap from the body pressings process, segregating it and re-melting it back into quality sheet aluminum at our supplier, to be used again to press out body panels, thereby reducing the need to use primary aluminum.

DESIGN

PERFORMANCE

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

VERSATILITY

PERSONALIZATION

ECO MODE

Eco Mode ensures the vehicle runs more efficiently and economically by using software to implement a range of actions - from softening the pedal on throttle and gear changes, to retuning the heating, ventilation and air conditioning when in Auto Mode and switching off heated door mirrors.

LOW CO₂ TECHNOLOGIES

Range Rover powertrains incorporate a variety of low CO₂ technologies. Our intelligent Stop/Start system is designed to improve fuel efficiency and reduce emissions. Mild Hybrid Electric Vehicle (MHEV) - considered the next generation of Stop/Start technology - takes this even further.

Our latest Plug-in Hybrid Electric Vehicle (PHEV) ensures both optimum performance and efficiency.

ENGINE MANUFACTURING CENTRE

Jaguar Land Rover's Engine Manufacturing Center, where our Ingenium engines are assembled, features one of the largest rooftop solar panel installations in the UK. Comprising of no fewer than 22,600 individual panels with 6.2MW generating capacity, the panels have the capability to provide up to 30 percent of the site's energy needs.

SMART REGENERATIVE CHARGING

Smart regenerative charging prioritizes the charging of the battery when the vehicle is decelerating, to capture wasted kinetic energy and helping to reduce fuel consumption.

SECURE

With its sophisticated design cues and use of materials, the Range Rover provides a strong all-aluminum monocoque body, while the elevated Command Driving Position provides enhanced visibility. You can see more of the road and be easily seen by other road users, providing an enhanced feeling of confidence.

Vehicle shown: Range Rover Autobiography in Byron Blue with optional features fitted.

DESIGN

PERFORMANCE

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

VERSATILITY

PERSONALIZATION

It has also been engineered to include a wealth of standard features:

Dynamic Stability Control (DSC) monitors the dynamic behavior of the Range Rover, intervening to enhance vehicle stability. DSC reduces engine torque and applies braking to the appropriate wheels, to correct the vehicle's direction of travel by counteracting understeer or oversteer*.

Anti-lock Braking System (ABS) helps the vehicle to maintain traction with the road surface while braking and prevents wheels from locking - thereby improving the vehicle's ability to steer. The system helps to shorten the braking distance.

Electronic Brake-force Distribution (EBD) automatically varies the braking force to each axle in order to help reduce stopping distance, while still maintaining stability and the vehicle's ability to steer*.

Electronic Traction Control (ETC) enhances traction and stability by controlling wheel spin. The ETC system reduces torque to the spinning wheel, then applies braking to the wheel, if required*.

Cornering Brake Control (CBC) automatically varies the braking force to each wheel when the vehicle's brakes are applied around a corner, and the limit of grip is reached. The system is designed to prevent the vehicle's wheels from locking up and skidding in this event, through varying the braking force applied to each wheel*.

Roll Stability Control (RSC) is integrated with DSC to help reduce the possibility of rollover, while providing agility and ability to steer around obstacles. It monitors the vehicle motion and cornering forces to detect any potential risk of rollover. When risk is detected, braking is applied to the outside front wheel to reduce forces which contribute to rollover*.

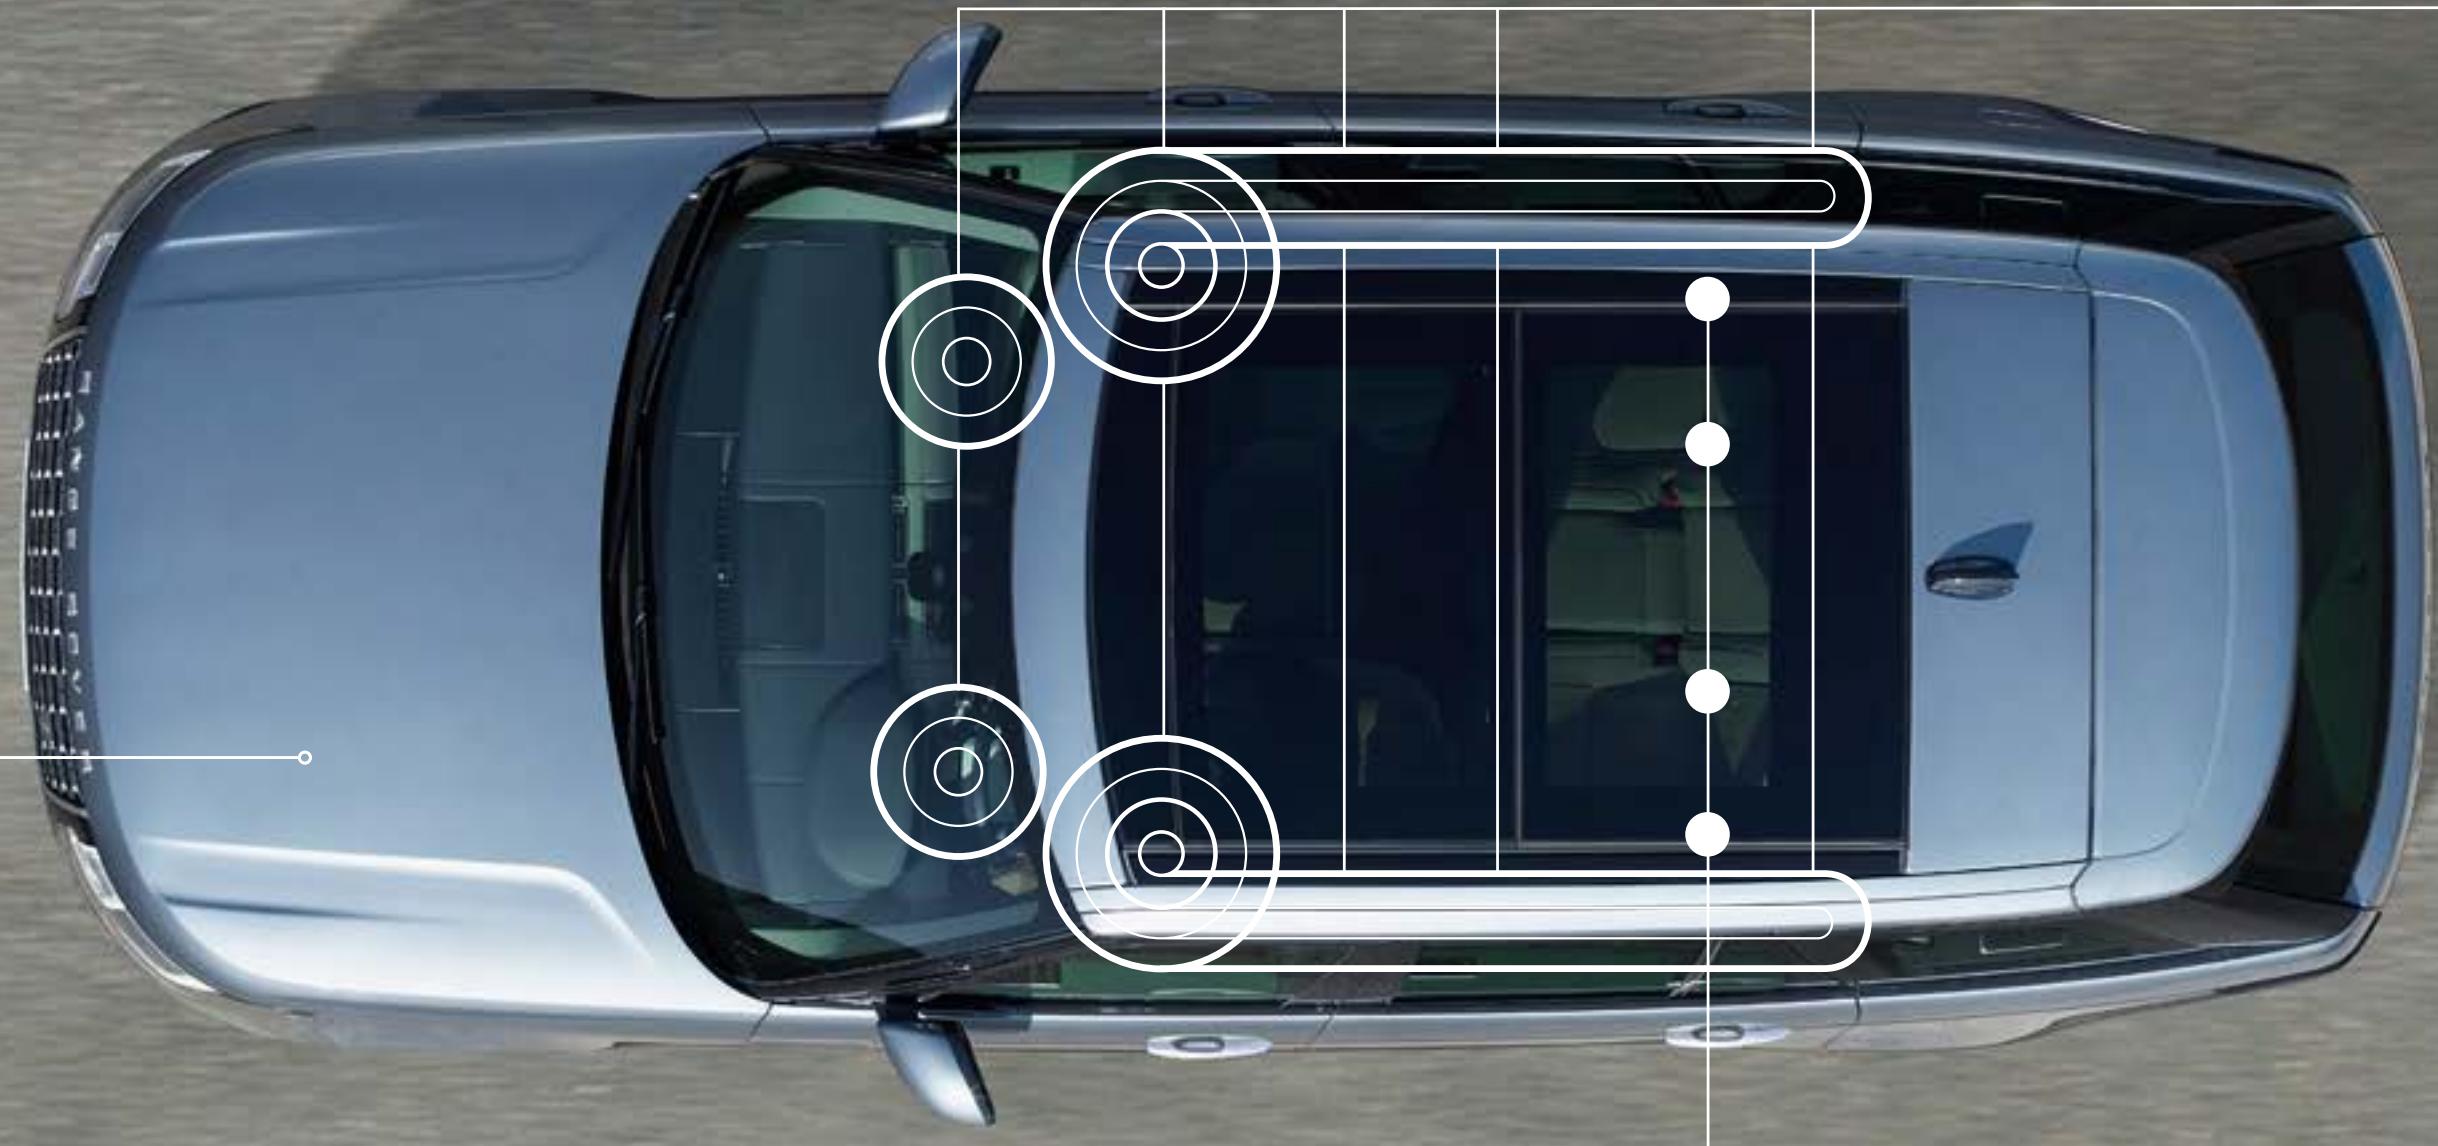

Emergency Brake Assist understands when you apply the brakes quickly but without the necessary force to maximize stopping performance. It boosts the brake pressure through the ABS pump to help reduce the stopping distance*.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

For easier installation, LATCH points on the rear seats are easy to access and additional protection is offered by seat belt pretensioners, which are activated in conjunction with the Supplementary Restraint System (SRS) to provide extra protection in the event of a severe frontal impact. They automatically reduce any slack in a seat belt to reduce forward movement. To further protect you, there is a comprehensive system of airbags* including driver and passenger airbags, side curtain and thorax.

*Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat.

LIGHTING TECHNOLOGY

The Range Rover features all-around exterior LED lighting with standard features, including signature Daytime Running Lights, automatic headlights and power wash. LED lights are designed to last and are more energy efficient. Also, the quality of light produced is closer to daylight conditions, so driving at night becomes less tiring.

The standard Premium LED headlights can be enhanced by the optional Auto High Beam Assist* which turns on the main beam and lowers it when other road users are detected.

*Only as part of the Vision Assist Pack.

ELEGANT ARRIVAL

Automatic Access Height allows you to get in and out of the vehicle with greater ease and elegance, as this feature lowers the vehicle by as much as 1.9 inches when activated. Prior to leaving the vehicle, the optional Clear Exit Monitor* provides an alert to rear seat passengers to help prevent them opening the door into approaching obstacles. The vehicle is also available with optional soft door close to provide power latching on the front and rear doors.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

INTERIOR CLIMATE

To prevent the cabin from overheating in the sun and minimize demands on the air conditioning, the auto sunblind closes automatically when passengers have disembarked and the doors locked. When the vehicle is re-opened the sunblind returns to the position prior to it auto-closing.

The optional Cabin Air Ionization with nanoe™ technology ionizes particles in the air, making them attract to surfaces thus helping to cleanse the air and can be switched on or off. An optional Four-zone Climate Control can also make life more comfortable by adjusting the temperature, direction, and intensity of airflow for each occupant..

CABIN AIR PURIFICATION SYSTEM WITH PM2.5 FILTER

By activating the PURIFY button in your vehicle, our specially designed filter will attract and capture fine particulates such as PM2.5, and airborne allergens such as dust and pollen from the outside air. The optional system cleanses the air in the cabin environment, reducing the vehicle occupants' exposure to the pollutants.

The nanoe™ ionization technology enhances the wellbeing of both driver and passengers alike. It does so by ionizing particles in the air, making them attract to and neutralize the air contaminants.

INTELLIGENT SEAT CARGO MODE/CONVENIENCE FOLD

Intelligent Seat Cargo Mode - enabling the power fold of the rear seats, while moving the front seats forward and preventing obstruction - is fitted with all 60:40 bench seats with power recline and load through (ideal for long items such as skis). Convenience Fold*, available with the optional rear Executive Class seats only, allows you to configure the rear seats via the upper Touchscreen or an app on your smartphone, which can be helpful when returning to your vehicle with an armful of shopping bags or an awkward load.

*Optional feature, model dependent.

POWER AND STORAGE

With two optional 110V/150W power outlets, up to five 12V sockets and up to seven USB ports located throughout the cabin, multiple electronic devices can be charged on the go. And to ensure your cabin is clutter-free, there is increased storage space including a recess specifically for smartphones in the front center console compartment.

In addition to the optional front center cooler compartment, a front center refrigerator compartment can be specified as an alternative, to provide the luxury of cooling drinks on demand. It can accommodate up to four 16 oz. bottles and maintain them at a temperature of 41°F, with the ability to perform a rapid cool to quickly chill your drink.

ACTIVITY KEY

With the optional Activity Key you can enjoy your favorite activities and keep your key securely in the vehicle. For extra convenience, you can strap the Activity Key to your wrist. The wristband is robust and fully waterproof, allowing you to take part in a range of activities from horse riding to swimming. Simply touch your Activity Key on the tailgate (to the first 'R' within 'Rover' on the 'Range Rover' tailgate script) to lock or unlock the car and deactivate or reactivate the conventional key fob.

TAILGATE

The split tailgate is distinctly Range Rover. Its electrically operated upper and lower tailgates help provide a platform for social and sporting events, coupled with greater protection from the elements. Powered gesture tailgate allows you to open and close the tailgate from the curb, without needing to touch either the vehicle or the key fob. And as the system is compatible with optional towing solutions, you can still tackle demanding situations with the least amount of fuss. Access to the cargo space is enhanced with Rear Height Adjust which lowers the rear suspension by up to 1.9 inches when the tailgate is opened. This creates a more natural ramp angle for ease of loading.

TOWING*

With a towing capacity of up to 7,716 lbs¹ and by incorporating tailored technologies, the Range Rover can handle the most demanding of tasks.

TOW HITCH ASSIST

Tow Hitch Assist makes coupling a trailer to the vehicle much easier by helping you visualize the hitching process; it displays the predicted path of the vehicle tow ball towards the trailer tow bar on the Touchscreen. Standard with Rear Camera**.

REAR HEIGHT ADJUST

Rear Height Adjust allows the use of switches in the cargo space or on the key fob to lower the rear suspension height by up to 1.9 inches - useful when loading or unloading cumbersome items, or when hitching, unhitching or loading a trailer.

*Never tow beyond a vehicle's permissible towing capacity. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

TRAILER STABILITY ASSIST

Trailer Stability Assist (TSA) gives you greater stability when towing. Should TSA detect a dangerous trailer sway situation is developing, it can help you regain control by gradually reducing the speed, through lowering engine power and applying the brakes individually on each side of the vehicle to help control the sway*.

TOW ASSIST

On the road, the Tow Assist feature helps with reversing by predicting the trailer's direction. You can even choose your trailer's width for precise guidelines displayed on the Touchscreen. Standard with 360° Surround Camera*.

ADVANCED TOW ASSIST

Advanced Tow Assist¹ allows you to control the direction of your trailer when reversing by using the rotary Terrain Response® 2 controller. The optional system will control the vehicle's steering to achieve the desired trailer trajectory*.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

¹Optional feature. Requires fitment of additional features.

EXTERIOR

Designed and engineered by Special Vehicle Operations (SVO) - the Land Rover center of excellence for bespoke commissions, luxury editions and performance models - the SVAutobiography Dynamic offers the pinnacle in performance and luxury.

Designed for luxury performance, the flowing lines and contemporary design of SVAutobiography Dynamic will turn heads all over the world. With a tuned chassis, steering, exhaust and suspension, the SVAutobiography Dynamic sits 0.3 inches lower than a standard Range Rover - its aggressive stance hinting at the power and performance contained within.

Unique Graphite Atlas accents, distinctive Red Land Rover branded brake calipers and exclusive wheels add to the performance appeal of the vehicle. The SVAutobiography Dynamic provides a new level of agility and performance for the driver to enjoy.

INTERIOR

Encapsulating luxurious comfort and style, the interior of Range Rover SVAutobiography Dynamic epitomizes the very best in sublime craftsmanship. Alluring to the touch, only the very finest Diamond Quilted leathers feature within the cabin. A knurled finish to interior features, including the Stop/Start button and foot pedals, add to the sense of refinement. The rotary shifter and Steel Weave Carbon Fiber finishers reflect the distinctive personality of the SVAutobiography Dynamic.

Actual seats have new cushions and interlayers with softer, looser leather to optimize these features.
Please refer to your Land Rover Retailer for more information.

EXTERIOR

Craftsmanship never goes out of style, and over 50 years of expertise in designing the Range Rover is manifested in each SVAutobiography Long Wheelbase. Every tailored aspect whispers elegance and attention to detail. Approaching the front, each vehicle is crafted with luxury design cues, such as the unique front grille and 'Range Rover' front and rear script with a dark knurled effect edged in Bright Chrome.

The SVAutobiography Long Wheelbase retains a poised stance, even with the 7.8 inches extra length. Body-colored side vent graphics are punctuated by Bright Chrome inserts, with Bright Chrome door handle surrounds and tailgate finisher. Unique 21" and 22" wheel choices complete the luxury design.

To reflect your personal taste, the option of exterior Duo Tone paint allows customers to specify the vehicle in one of eight exterior colors below the waistline, with a Santorini Black, Aruba or Eiger Grey finish above the waistline to produce a prestigious appearance.

INTERIOR

Power close rear doors at the touch of a button in the interior of SVAutobiography Long Wheelbase is the epitome of refined, sophisticated and indulgent living. Attention to the finest detail is in everything you see and touch. From the rear center console's power deployable tables to the exclusive Diamond Quilted leather seats and rear seat refrigerated compartment, the vehicle exudes confidence and a calm, collected air.

A knurled finish to interior features such as the Stop/Start button, Zenith clock, rotary shifter and armrest adjusters, all add to the refined look. The leather-wrapped sides of the parcel shelf and cargo space, and Comfort Plus Executive Class seats come as standard. This ensures every journey is a truly relaxing experience. Optional features include a power deployable cargo space floor in veneer or carpet finish and a tailgate event seating system. This provides two comfortable luxury leather seats which mount to the tailgate when the vehicle is stationary, for participating in outdoor events.

Actual seats have new cushions and interlayers with softer, looser leather to optimize these features.
Please refer to your Land Rover Retailer for more information.

EXTERIOR STYLING

SVO Design Pack¹² – SVO Design Pack provides a purposeful, dynamic and stunning styling enhancement that allows customers to add their own stamp of individuality by tailoring their Range Rover. Exterior features include a unique front bumper with integrated tailpipes, side vents, grille and side sill claddings.

Noble Chrome Mirror Covers – Noble Chrome plated Mirror Covers designed to enhance the Range Rover's exterior styling cues. This neat styling upgrade complements various Dark Atlas, Light Atlas and Bright finish exterior trims.

Deployable Side Steps² – These smart, practical steps make it easier to get in and out of the vehicle..

Neatly stowed under the sills, the side steps automatically deploy as soon as the door is opened, or when activated by the key fob. They stow automatically when the door is closed. The side steps are sensitive to obstructions and will not deploy in off-road or low-range settings. Automatic Mode can be overridden to allow access to the roof when the doors are closed. The Deployable Side Steps are compatible with Front Mudflaps and feature a Stainless Steel finish with laser etched Range Rover branding.

Fixed Side Steps²³ – Complete with a rubber tread mat and Brushed Stainless Steel trim, the Fixed Side Steps provide easy access/exit to the vehicle's cabin and aid access to the roof. With embossed Range Rover branding, exterior Bright work and Bright Anodized Aluminum edge trim finish, they complement the vehicle's exterior styling cues.

¹Requires fitment of an additional feature. Engine dependent. ²Only offered with SWB. ³Fitting of side steps may affect the off-road capability of the vehicle.

INTERIOR STYLING

Illuminated Treadplates - Illuminated Treadplates with Range Rover lettering and halo surround. Rear treadplates feature illuminated halo only.

Personalized Illuminated Treadplates - Personalized illuminated treadplates allow you to choose a personalized message using an approved set of fonts/typefaces which will be highlighted in white illumination when the front doors are open.

Aluminum Gearshift Paddles¹ - Complete the look and feel of your steering wheel with premium aluminum paddles. Gearshift paddles are machine polished, anodized and hand-brushed to provide exceptional wear resistance with a premium finish.

Sport Pedal Covers - Alternative pedal covers for an interior styling enhancement featuring a Bright finish. Manufactured from Polished and Etched Stainless Steel and features hidden fixings for a clean finish.

INTERIOR PROTECTION

Rubber Mats - Rubber footwell mats for front and second row occupants help provide protection from general dirt. Featuring Bright accent Range Rover ingot and durable metal corner pieces.

Cargo Space Rubber Mat² - Range Rover branded waterproof rubber mat, helps protect the rear cargo space carpet from general dirt.

Cargo Space Reversible Carpet Mat and Liner² - All-in-one premium cargo space carpet mat and double layer reversible rubber liner helps protect the rear cargo space area from general dirt. The liner can be folded out to cover the back of the second row seats when folded down. Also includes fold-out bumper protector.

Full Height Luggage Partition - Designed to protect vehicle occupants against the displacement of luggage. Following initial retailer installation the luggage partition can be removed with appropriate fitting tool.

¹Requires fitment of an additional feature. ²Not available with P400e engine or when fitted with Executive Class rear seating.

CARRYING

Sports Roof Box* – The sleek, aerodynamically designed Sports Roof Box with a Gloss Black finish, can be mounted on either side of the vehicle for curbside opening and is lockable for security.

Roof Mounted Bike Carrier* – Roof mounted, lockable bike carrier designed for holding a single bike up to 44 lbs.

Aqua Sports Carrier* – Carries a sailboard, canoe or kayak. Includes lockable multi-purpose holder to carry oars or paddles. Tilts to facilitate easy loading/unloading. Features lockable straps and rubber supports to maintain optimum weight distribution, whilst protecting the kayak and vehicle from scratches/scuffs. Maximum load capacity 99 lbs.

Ski/Snowboard Carrier* – Carries four pairs of skis or two snowboards and incorporates slider rails for easy loading, is also lockable for security. Maximum payload 79 lbs.

*Roof rails and cross bars are required for all Land Rover roof-mounted accessories. Maximum payload equals the load capacity of the roof-mounted accessory. Objects placed above the roof-mounted satellite antenna may reduce the quality of the signal received by the vehicle and could have a detrimental effect on the navigation and satellite radio systems, if fitted. Some roof carrying accessories may restrict the opening of the vehicle's sliding sunroof when fitted. Care should be taken when opening the roof to avoid collision with any items fitted above the vehicle.

FUNCTION AND TECHNOLOGY

Wireless Phone Charging Cup Holder - The Wireless Phone Charging Cup Holder has been designed to charge utilizing the cup holder space in the center console. The holder will accommodate varying phone sizes securely in place. The charger displays an LED light to indicate when charging, and turns off when complete. Fits phones up to 2.65 inches wide.

Center Armrest Cooler/Warmer Box - Food and drinks cooler and warmer that acts as a rear center armrest. With a leather-covered top, it is held in place by the center seat belt and powered from the rear auxiliary socket. Ideal for long journeys with the family.

Click and Go System¹ - The Click and Go Range is a multi-purpose seat back system for second row passengers. The versatile Click and Go base fixes between the headrest mountings, and further attachments can be added to hold tablets, bags, and shirts or jackets. Each attachment is sold separately. The base can be easily removed when not in use.

Tailgate Event Seating in Ebony leather² - The Tailgate Event Seating is handcrafted from beautiful Ebony Windsor leather with a highly durable aluminum frame. Stowed in the cargo space, these seats can be quickly and easily fitted to provide comfortable seating for two adults on the lower tailgate, when the vehicle is stationary.

¹Requires fitment of Click and Go base unit. Not compatible with vehicles fitted with 10" Rear Seat Entertainment.

²Mounts to tailgate when opened. Engine dependent.

PET PRODUCTS

Pet Cargo Space Protection Pack – Designed to provide water resistant protection and easy cleaning of the cargo space from wet and muddy paws. Combines the Quilted Cargo Space Liner*, Full Height Luggage Partition and Spill Resistant Pet Bowl.

Pet Transportation Pack – Convenient option to provide a comfortable environment for transporting pets, which can be fitted or removed quickly as and when required. Combines the Foldable Pet Carrier, Spill Resistant Pet Bowl and Cargo Space Rubber Mat.

Pet Care and Access Pack – Taking the effort out of transporting pets, this option ensures everything required is to hand to transport pets in comfort. Combines the Full Height Luggage Partition, Quilted Cargo Space Liner*, Pet Access Ramp and Portable Rinse System.

Quilted Cargo Space Liner* – A tailored liner which covers and protects the cargo space floor, second row seat backs and cargo space side walls up to window height. Manufactured from a soft quilted fabric, with an integral rubber mat and detachable bumper protector, it is ideal for owners who regularly carry pets in the cargo space of their vehicle.

Foldable Pet Carrier – The Foldable Pet Carrier provides a safe, comfortable environment for the transportation of pets. Manufactured from a durable 600D nylon, the Foldable Pet Carrier has a lightweight metal frame and includes a quilted fabric cushion, net windows and a spring loaded locking mechanism which snaps into place when required. Windsor leather carry handles and corner pieces provide a premium finish, with a side pocket providing a convenient stowage option for other pet accessories or small items.

*Not available with P400e engine or when fitted with Executive Class rear seating.

THE RANGE ROVER COLLECTION

Our exclusive collection of accessories is inspired by our vehicles and made with a quintessentially British sense of style.

Range Rover Leather Tote Bag - Style, simplicity, sophistication. It all comes to the fore with this cross-grained leather tote bag in Deep Garnet. Featuring a chevron print lining with an easy-to-reach internal key pocket, its design is understated yet unmistakable.

Range Rover Round Keyring - Crafted from Milled Steel, this distinctive keyring is inspired by the Range Rover rotary dial. With a Black nickel finish and debossed wordmark to the outer ring edge.

Range Rover Umbrella - Your cover for all conditions. This wind-tested Range Rover Umbrella features a Black leather handle with debossed Range Rover wordmark, spring-loaded automatic opening and polycotton canopy.

Range Rover Cufflinks - A refined set of whale-back cufflinks inspired by the Range Rover rotary dial and crafted from Milled Steel. With a Black nickel finish and debossed wordmark.

Range Rover Leather Wallet - An elegant cross-grained leather wallet in Deep Garnet with chevron print to the inner lining. Features Range Rover rotary dial detail with debossed wordmark to the inside.

Range Rover Sunglasses - Lightweight aviator-style sunglasses in Silver. Machined from a single sheet of Japanese beta-titanium, with NXT® polarized lenses for ultimate UV protection and color clarity. Other styles available.

DIMENSIONS AND CAPABILITIES

STANDARD RIDE HEIGHT

With panoramic roof open (SWB/LWB)

73.8 inches / 74.0 inches

With telematics roof antenna (SWB/LWB)

73.6 inches / 73.5 inches

Access height air suspension setting will reduce each of the above by 1.9 inches

HEADROOM

Maximum front/rear headroom with panoramic roof

39.5 inches / 39.4 inches (LWB 39.0 inches)

LEGROOM

Maximum front legroom 39.1 inches

Maximum rear legroom 39.3 inches (LWB 46.8 inches)

CARGO SPACE CAPACITY*

Height 3.3 inches, Width 50.8 inches

Cargo space width between arches 44.1 inches

Maximum cargo space volume behind first row 34.50 cu.ft

Maximum cargo space volume behind second row (SWB/LWB)

70.90 cu.ft / 77.50 cu.ft

Executive rear seating reduces length behind row 2 by 3.1 inches and P400e models reduce the height by 1.8 inches.

OBSTACLE CLEARANCE

Off-road height 11.7 inches

Standard ride height 8.7 inches

TURNING CIRCLE

Curb-to-curb 40.4 ft (LWB 43.0 ft)

Wall-to-wall 41.6 ft (LWB 44.0 ft)

Turns lock-to-lock 3.03

WADING DEPTH

Maximum wading depth 35.4 inches**

Width 81.6 inches mirrors folded

Width 87.4 inches mirrors out

Front wheel track 66.7 inches

Rear wheel track 66.3 inches

	A	B	C
Ride Height	Approach Angle	Ramp Angle	Departure Angle
Off-road (SWB/LWB)	34.7°	28.2°/25.6°	29.0°
Standard (SWB/LWB)	25.5°	21.5°/20.0°	24.5°

Standard Wheelbase (SWB) 115.0 inches
Long Wheelbase (LWB) 123.0 inches

Standard overall length 196.9 inches (Long Wheelbase 204.7 inches)

*Rear loadspace capacity is reduced on P400e models. **Wading depth (25 deg entry and exit) 29.5 inches, Deep Fording depth (9 deg entry and exit) 35.4 inches. Driving in floodwaters or moving water should be avoided. Driving through water can be extremely dangerous. The Wade Sensing feature only detects depth of water the vehicle is in at the present time and not of water ahead or around the vehicle. Therefore, Wade Sensing cannot predict whether it is safe to proceed and cannot detect steep drops in grade around the vehicle. The driver is responsible for determining the conditions of the route being driven.

Figures shown may differ for 5.0L V8 Supercharged 557HP.

Please note: Figures relate to both Standard Wheelbase (SWB) and Long Wheelbase (LWB) models unless stated.
